

11650 - Rainbow Explorer Water Centre

Assembly Instructions

Components:

Bag of screws x 1, 1x Roof (with coloured windows), 4x Legs, 1x Tray Support, 1x Shelf, 1x Hanging Rails, 1x Water Play Rail.

			
1. Check you have all of your components, a mallet, a screwdriver and we advise you also have some help.	2. This is the most complicated bit. Your shelf, tray support and rails go into the 4 legs at the same time.	3. To do this, slot each leg on to each of the shelves and align with the support in the leg. Once on, repeat for all 4 legs.	4. If they need it, use the mallet to tap each of the components into place. (We made it a tight fit to make it extra safe)
			
5. Place the roof on the top of this structure, ensuring all the legs line up to the corners.	6. Ensure that all of the corners and intersections meet up tightly. This will give the maximum structural strength.	7. Finally, screw in the screws at all of the intersecting points. These are marked by piloted holes on the legs and roof.	8. Place the water funnel rail in place and Enjoy!
